

Apollo XL-Long grading machines

The Apollo XL-Long grading machine has very high capacity, and is suitable for the grading of both smolt and larger fish. The machine features the same advantages and quality as the Standard machines, but has longer and larger rollers, various roller distances and in general designed for high capacity grading.

The grader suits most grading applications since it is available with various options when it comes to roller distance, number of outlets and type of dewaterer. Recommended max fish size is ca. 1.5 kg.

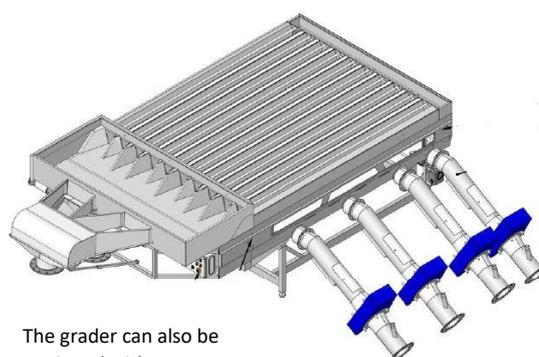

The grader is long lasting and has operational reliability due to the solid design in stainless steel

Model	10-track XL-Long 2-45	10-track XL-Long 12-55	10-track XL-Long 22-65
Roller length, cm	300	300	300
Roller diameter, mm	89	89	89
Roller distance, mm	2-45	12-55	22-65
Number of outlets	2, 3 or 4	2, 3 or 4	2, 3 or 4
Outlet size, mm	200	200	200
Motor, kW	0.37	0.37	0.37
Weight, kg *	1000	1025	1050
Dimensions, cm **	427x260x135	427x270x135	427x280x135

* Weight is without dewaterer, and will also be depended upon number of outlets

** Length is without dewaterer

The grader can also be equipped with a counter on each outlet.
